Summary

Full Stack Developer with hands-on experience building web applications, AI-powered SaaS products, and intelligent chat systems. Skilled in Java, Spring Boot, React, REST APIs, database development, authentication, and AI integration. Experienced in developing scalable backend services, interactive frontend applications, AI smart bots, and SaaS-based solutions. Passionate about building practical AI products with clean architecture, secure APIs, and user-focused experiences.

Experience

E***** technology** **Feb 2025 – Present**
Full Stack Developer *Noida, India*

- Developing full-stack web applications using Java, Spring Boot, React, and RESTful APIs.
- Developing multiple AI-powered SaaS products and intelligent automation solutions.
- Building AI chat systems and smart bot solutions for conversational and task-based interactions.
- Designing and developing secure backend services using Spring Boot, Spring Security, JWT, and layered architecture.
- Building responsive frontend interfaces and integrating them with backend APIs.
- Working with PostgreSQL, MySQL, and Spring Data JPA for data persistence and application development.
- Integrating AI capabilities into web applications to build intelligent SaaS features and automation workflows.
- Testing and debugging APIs using Postman and collaborating with developers to implement new features and resolve issues.

Education

VIT Bhopal University **2023 – 2025**
MCA - Master of Computer Applications - CGPA: 8.5/10 *Bhopal, MP*
CSJM University **2020 – 2023**
BCA - Bachelor of Computer Applications - Percentage: 71% *Kanpur, UP*

Technical Skills

- **Languages:** Java, JavaScript, SQL, HTML, CSS
- **Frontend:** React, JavaScript, HTML, CSS, REST API Integration
- **Backend:** Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC, JPA
- **AI & SaaS:** AI Chat Systems, AI Smart Bots, AI SaaS Products, AI API Integration, Intelligent Automation
- **Tools & Technologies:** Maven, Git, GitHub, Docker, Postman, IntelliJ IDEA, JWT
- **Databases:** PostgreSQL, MySQL, MongoDB

Projects

AI SaaS & Smart Chat System | Spring Boot, React, AI APIs **2026**

- Developing an AI-powered SaaS platform with intelligent chat and smart bot capabilities.
- Building conversational AI features for user interaction, assistance, and automated task workflows.
- Developing Spring Boot REST APIs and React-based interfaces for the AI application.
- Implementing authentication, user management, and secure API communication for the SaaS platform.

SSO System | Spring Boot, OAuth2, JWT **2026**

- Developing enterprise-grade SSO solution for multi-application authentication at Echt Tech.
- Implementing OAuth2 authorization server with JWT tokens for secure authentication.
- Integrating LDAP and Active Directory for centralized user management.
- Supporting SAML 2.0 and OIDC protocols for third-party integration.

Certifications

- SQL (5-Star) – HackerRank
- Networking Basics – Cisco

Achievements

- Top 5% in SQL on HackerRank among 500K+ participants
- Secured internship at Sabudh Foundation through competitive selection
